

GE-RE C Cutter Compactor series for highly printed recycling for a large scale

Inspired by the parent design, GE-RE C series offers an edge over the quality, being best suitable for Low bulk density highly printed materials. Compactors Series offers the blending of different polymers laminates, delivering close to compounding results in single process. With this series we are setting true standards for higher volume, GE-RE C trims are available up to 1000Kg/Hr.
