

## Granule **Palletizing Solutions** the way you like.

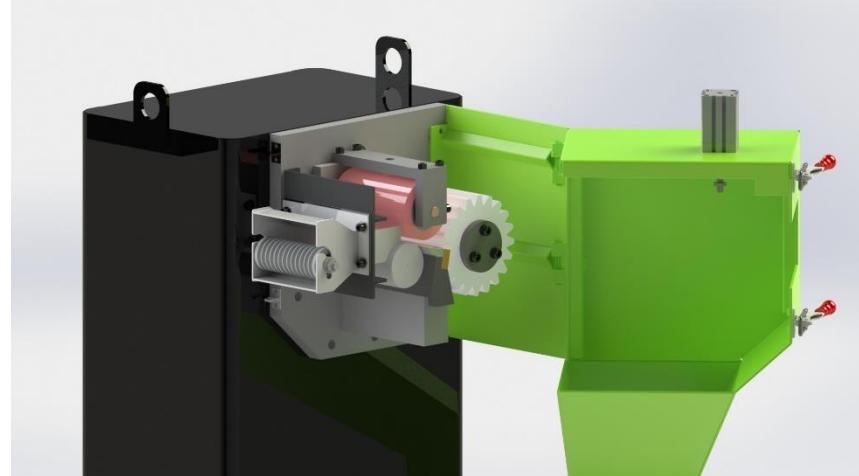

### WATER RING DIE-FACE CUTTER

#### **GE-DFC Series**

Producing large volumes of pallets and needs a consistent granule shape to mix with the virgin granules. Introducing precision with quality, GE-DFC palletizers sets benchmark.

Versatile for PP, LD, HD, EVA, BOPP, PC, HIPS, Derlin etc. Our DFC has recorded to palletise even **35 MFI** polymers in water ring.

With our iconic filtration unit smallest polymer fines is now collected separately plus **NO CHILLER** requirement is our long-standing standard. An engineering excellence delivering consistent dry granules. Variants available up to 1000 Kg/Hr.

### ROTARY STRAND CUTTER

#### **GE-SC Serie**

Changing polymer colours is lot easier, no more residuals. Thanks to Gaurav strand palletising system GE-SC. Clean fresh pallets with every new batch. Whereas changing blades have became quick & user-friendly.

A perfect small companion for masterbatch, compounding and recycling industry. Variants available up to 500 Kg/Hr.
